

8400 Series Harvesters with a 4865/4870 Feeder House

In a continuing effort to maximize the overall product performance, Oxbo is now introducing a reinforcement kit, which includes heavy duty bearing plates and lower angle supports.

Advantages

- The heavy duty bearing plates will offer added strength and support for harvesters utilizing larger corn heads.
- The angle supports will improve the overall structural strength of the feeder house when utilizing larger corn heads.
