

Torsion Block Catcher System

Oxbo Harvesting Solutions delivering new levels of:

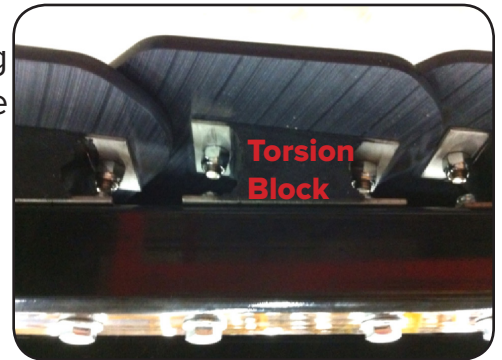

Performance

- Maintains a positive “tension load” consistency throughout the part life, springs may weaken over time, reducing catcher tension
- More reliable catcher improves performance by increasing fruit catching ability

Durability

- Torsion system more flexible when maneuvering machine, reduces potential of component failure
- Improved harvest uptime, springs can stress whereas torsion blocks are more reliable and consistent

View from Bottom

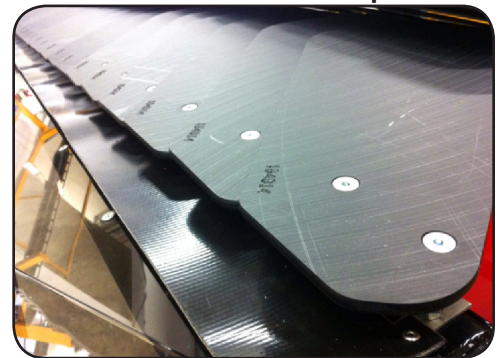

Harvester Equity

- Steer light system compatible, assures reliable operation of steer light feature
- High Performance Components extend the operational life of the harvester, drive increased equipment value and maximize overall return on investment

Kit	Machine Applications
155860	6220
155864	3016XL, 316XL, 3009XL, 309XL, 4012 & 4220
157182	3209XL & 3216XL*
159960	NON-XL 3016, 3009 * 316
All kits include the rails, catchers & torsion blocks.
