

68888: Crop Hold Down Kit Oxbo 84xx Series

To keep Oxbo performance at its' best, Oxbo is now offering a Crop Hold Down Kit for the 601 chain conveyor and 602 belted conveyor cleaning units. This performance enhancement system can provide assistance with dry corn fodder feeding through the cleaning unit. It provides pressure on the stalks and trash, enabling the conveyor flighting to more effectively pull trash through.

** 601 chain conveyor pictured

Advantages

- Able to maintain consistent picking speed without having to slow down due to the dry corn balling up
- Improved air flow allowing more debris to be pushed through the conveyor
- The long plastic slats would help drag stalks length-wise and help orientate in a favorable position for the rear set of trash rolls to pull stalks out

68888: KIT, C/U CROP HOLD DOWN		
Part Number	Quantity	Description
230514	1	Scroll, C/U Crop Hold
