

Oxbo 156 and 6156 Hydraulic Reversing Fan Kit

In a continuing effort to offer the most effective and durable products, Oxbo presents the hydraulic reversing fan kit for the 156 and 6156 pea/Lima harvesters. The reversing fan in this hydraulically driven kit helps keep the radiator clean from trash to reduce temperature on the engine and hydraulic system.

	6156	156
Kit Number	67925	67926
		
	Reversing capabilities can be programmed into the Oscar control system. (Oxbo technical service will perform computer install).	Only on the 156 with the 6125H John Deere engine. No programming into the HVS Monitor system required. A separate controller is included in the kit.
