

Swept Back Catcher

For Torsion Blocks

Currently, Oxbo has swept back catcher assemblies available for the 6120 and 6220 vineyard harvesters.

There are torsion block catcher rails available on models 3009, 3016, 3209, and 3216 harvesters. Swept back catchers can be used on any Oxbo torsion block rails. There are no kits available for any of the 3000 series harvesters, but individual parts can be ordered to build your own rail + catchers.

PART NUMBER	DESCRIPTION	MODELS	YEAR	NOTES
155860	6220 Swept Back Catcher Assembly	6220	2010 - present	Complete Kit

157185	Torsion Catcher Rail Weldment, Left	3209XL, 3216XL	Will fit any wide-trellis 3000 XL	
157186	Torsion Catcher Rail Weldment, Right	3209XL, 3216XL		

Jeff Cederlind from Cederlind Farms, had the swept back torsion catcher system installed on one of his harvesters for half of the 2015 vineyard harvest. Due to the effectiveness and reliability of the swept back torsion catcher system, Jeff decided to upgrade all of his harvesters in 2016.

Benefits of Swept Back Catchers

- The angle of the swept back system is more forgiving and reduces wear.
- The fruit is swept off the plates more efficiently, resulting in cleaner fruit.
- Torsion blocks deliver reliability and a faster snap back.
- Additional plate overlap improves fruit recovery.
