

Upgrade to Heavy-Duty PremiumSort Belting for Model 6120 & 6220 Harvesters

Heavy duty PremiumSort belting is now standard on 2017 Oxbo models 6220 and 6120. Oxbo is offering a program for a limited time. Owners of older models have an opportunity to upgrade their belting at a reduced cost.

The heavy duty belting:

- Is backwards retrofitable with existing destemmer and petiole belting
 - You don't need to convert your belting to use HD belting in the future to replace sections
- Is now the only style of belting sold through parts (in full belts and by the foot)
- Features longer pins with grooves and retaining clips—this style belting has proved more durable in field tests and addresses a common customer dissatisfier with the original belt design

Program dates: **April 15 – June 15, 2017**

Program offer:

- Oxbo will provide new **pins and retaining clips** (Pictured to the right) at no cost to the customer.
- Customer provides the labor to rework the belting; or labor can be scheduled (at the customer's cost) through an Oxbo or Dealer service department.
- Program dates are firm; after the program dates, customers will be required to purchase pins and clips from Oxbo.

How to Order:

Call Freddy or Alex at 360-354-1500 ext. 3

Belt	Number of Pins (Part Number 158180)	Number of Clips (Part Number 930891)
